PRINS LPG SYSTEM*

The AEC RAM 1500 with Prins LPG System offers optimum performances in terms of power, quality and flexibility, as well as very attractive fuel costs make this pickup truck appealing to a wide range of customers.

Both AEC and Prins ensure high quality installations and rigorous end-of- line tests on all vehicles through central conversions, accomplished by experienced professionals at the AEC's Vehicle Processing Center in Antwerp, Belgium. Thanks to Prins validated software and accurate calibration tested on a dyno bench, the RAM 1500 with LPG System performs optimally under all circumstances.

PERFORMANCE OPTIMIZATION*

2016-2020 RAM 1500 CLASSIC 5.7 L V8 HEMI®

With its massive 5.7 l V8 HEMI® engine the AEC 1500 RAM already boasts a lot of power. But there is always room for more. With our exclusive partner O.C.T you get the opportunity to tune up your RAM with the best available expertise. Take your RAM 1500 to a new performance level.

Please note that a non-compatible BCM must be replaced prior to any tuning modifications.

BCM compatible with O.C.T:

68287182AH / 68287182AI

68287182AJ / 68287182AK

After replacing the BCM the unit must be flashed via wiTECH 2.0.

BCM Installation guideline can be obtained from: support@aeceurope.com

A replacement BCM can be ordered from: parts@aeceurope.com

BIOETHANOL E85 CONVERSION*

Experience full flexibility with AEC's E85 conversion. Save up to 50% fuel costs vs. gasoline (depending on local fuel costs). There is no additional fuel tank required. As all AEC innovations, our system is not comparable with any aftermarket solution and is delivered in OEM quality. Mixing fuels is allowed, no need to fill only gasoline or only Bioethanol. Our system is equipped with a temperature sensor which improves the "cold start" in winter. This system provides positive WLTP testing results with CO₂ emissions of 300g/km instead of 320 g/km in gasoline mode.
